

SYMPHONIUM MUSIC DISK - PROTOTYPE QUOTE

Pachelbel 20-tine sampler | Printed/top-face view | All dimensions in mm

Reference drawing only. Manufacture from pachelbel_cut_mm.dxf at 1:1 scale.

Drive openings	143 rectangles, 2.540 radial x 2.286 tangential
Drive center radius	85.6742; equal angular spacing
Minimum drive bridge	1.4228
Minimum outer edge margin	1.9483 at drive corner
Xometry material request	Clear PETG, 0.508 mm (0.020 in); original thickness reference
SendCutSend material request	Clear polypropylene, 0.762 mm (0.030 in); thickness experiment

SUPPLIER CONFIRMATION REQUIRED BEFORE CUTTING

Center post: 4.8895 mm. Nominal diametral clearance: 0.1905 mm.
Confirm the minimum finished opening through the full thickness clears the post.
State achievable hole/position tolerances and corner rounding; propose any changes for review.
Confirm stock thickness and flat, clean-edged delivery. Quantity: quote 1, optional price for 2.
Dimensions are prototype nominals. This drawing does not impose an unverified +/- tolerance.
